

RE: Collier's Topform; how to select the exemptions available in another state, but e-file in South Dakota:

1. Go to Setup, select Exemption Laws from the drop down list;
2. Click on the Default Exemption Law window;
3. Look to the right and see if the county you need is on the list. If so, select it. If not, and for example, if you need to apply Colorado exemptions, but need to extract Pennington County, South Dakota when you e-file, then click on the binoculars above and to the right of the window and you will see South Dakota as an option;

Double click on the state that you want (South Dakota in our case), then click Ok, and you are done.
